I have over 7 years of experience in Top Management, where I prioritized enhancing and developing websites in collaboration with developers. This experience ignited my interest in technology, prompting me to explore front-end web development. Over the past two years, I've been self-learning HTML, CSS, and JavaScript. Following a recommendation, I delved into React JS at SKILLWILL and continued my studies independently through Udemy courses. I now possess understanding in React Hooks, React Router, React Redux, Redux Toolkit, and Reducers. My pursuit of tech skills aligns with my career goal of leveraging technology to streamline processes, eliminate errors, and enhance team productivity.
